## Capital Structure

|  | Happy playz |  |  | Gleetill |  |
| :--- | :---: | :---: | :---: | :---: | :---: |
| Ratio | $\mathbf{2 0 2 1}$ | $\mathbf{2 0 2 0}$ |  | $\mathbf{2 0 2 1}$ |  |
| Gearing ratio(D/D+E) | $46.2 \%$ | $45.2 \%$ | $\mathbf{2 0 2 0}$ |  |  |
| Gearing ratio(D/E) | $86 \%$ | $82.6 \%$ | $55.9 \%$ | $41.2 \%$ |  |
| Interest cover | 5.7 | 5.1 | $70.2 \%$ |  |  |
| Effective interest rate | $9.1 \%$ | $9 \%$ | 7 | 7.6 |  |

- The generally accepted threshold for gearing is $50 \%$ based on (D/D+E)
- Happy Playz's gearing of $46.2 \%(D / D+E)$ is within the acceptable threshold by a small margin.
- Since HP is highly geared, it limits the company's potential to borrow in the future or to borrow at lower interest rates.
- Gleetill has a better gearing and interest cover than Happy Playz.

## Liquidity

|  | Happy Playz |  | Gleetill |  |
| :--- | :--- | :--- | :--- | :--- |
|  |  |  |  |  |
| Ratio | $\mathbf{2 0 2 1}$ | $\mathbf{2 0 2 0}$ | $\mathbf{2 0 2 1}$ | $\mathbf{2 0 2 0}$ |
| Current ratio | 0.76 | 0.77 | 0.69 | 0.63 |
| Quick ratio | 0.35 | 0.33 | 0.36 | 0.32 |

- Although, the ideal current ratio is said to be $2: 1$ and the ideal quick ratio to be $1: 1$, this is dependent upon the industry under consideration.
- In retail organisations, lower levels of current and quick ratios can be expected.
- Hence, the company's position should be compared against the industry average to arrive at a meaningful conclusion.
- When comparing the ratios of Happy Playz's with direct competitor Gleetill, it can be observed that Happy Playz's liquidity position does not appear to indicate any major concerns.

## Activity/Efficiency Ratios

|  | Happy Playz |  | Gleetill |  |
| :---: | :---: | :---: | :---: | :---: |
| Ratio | 2021 | 2020 | 2021 | 2020 |
| Receivable days | 8 | 7.5 | 11 | 10 |
| Inventory days | 33 | 35 | 26 | 25 |
| Payable days | 38 | 36 | 46 | 48 |
| Working Capital Cycle | 3 | 6.5 | (9) | (13) |
| Asset turnover | 3.3 | 3.1 | 2.7 | 3.3 |

- A slight increase in payable days and a slight decrease in inventory days have contributed towards an improvement in the working capital cycle for Happy Playz.
- Gleetill has a negative working capital cycle mainly due to longer payable days which can have a detrimental impact on relations with suppliers.
- There appears to be no major concerns with the working capital position of Happy Playz
